FIGHT WITH BANK ROBBERS.

Night Watchman Opens Fire on a Gang of Burglars, Wounding at Least One, but All Escape.

Lancaster, Pa., Feb. 8.—Early today an attempt was made to rob the City National bank at Lancaster, Pa., sixteen miles east of this city, ending in a lively exchange of shots between the town's watchman, David Stank, and the burglars.

Stank heard an explosion at the bank and found three or four men standing in front of the building who ordered him to hold up his hands. Stank opened fire on the burglars, wounding at least one, as there were blood marks where they had been standing. The robbers returned the fire, Stank backing away toward the home of the cashier with the view of getting assistance.

When the shooting began two or three other men ran out of the bank building, and joining their comrades, disappeared in the darkness.

An examination disclosed the fact that the men had attempted to break the vault open with dynamite or nitroglycerine, but without success.

Early this morning a stranger group, headed by a man in a dark coat, appeared at the bank, and asked to see the cashier. The cashier, who was in the bank, refused to see them, and they left.

One of the supposed robbers, whose name was given as Glen, was seen subsequently at Lancaster. He had a bad wound in the face.

BOER LAAGER FALLS.

Captured by Col. Kekewich, After a Sharp Fight.

Johannesburg, Feb. 8.—At 11 o'clock last Thursday night Col. Kekewich, having ascertained the whereabouts of the Boer laager at the foot of the mountain, sent men to capture it. The British force arrived at daybreak and immediately surrounded the laager.

The Boers were completely surprised, and after a short fight the British force captured the laager. The Boers were taken to the British camp, and the laager was destroyed.

CAME UNDER THE SKEL.

A dispatch to the Exchange Telegraph company from London indicates the probability of the removal of the Boer laager from the foot of the mountain.

The Boer laager was captured by the British force, and the Boers were taken to the British camp. The laager was destroyed, and the Boers were taken to the British camp.

HAS BUT FEW CURVES

Why Commission Favors the Panama Route for Canal.

ADMIRAL WALKER'S STORY

His Concludes Testimony Before the Senate Committee on Inter-Oceanic Canals—He Says the Panama Route Is Much Shorter—Says Morgan Questions Witness Regarding the Power of New Panama Canal Company to Transfer Property and Give Clear Title.

Washington, Feb. 8.—Admiral Walker concluded his testimony before the Senate Committee on Inter-Oceanic Canals today and Col. Hauge, another member of the committee, began his testimony.

The examination today was with reference to the reasons why the canal commission changed its recommendation from the Nicaragua to the Panama route.

The reasons given by the witness for this change, summed up, are that the Panama route is much shorter, and has fewer curves, and is not so sharp as the Nicaragua route.

He also said he believed that with proper quarantine regulations the health conditions of the region along the Panama route could be much improved. He did not consider the present condition of the region a health problem.

The questions bringing out these points were asked largely by Senator Hanna, who also made inquiries concerning the water supply for the Panama route, and the difficulties in the way of constructing a dam at Gatun.

Admiral Walker said he had no doubt that the engineering difficulties could be overcome, and he also expressed the opinion that the water supply would be ample.

He stated, in reply to questions by other Senators, that one of the curves in the Panama waterway would be quite sharp, but he was of the opinion that steam vessels would be able to round it. He also said that the Panama route could be maintained at a minimal cost.

Senator Morgan questioned the witness at length with reference to the commission's investigation of the power of the new Panama Canal company to transfer the property and give clear title.

In reply to his questions, Admiral Walker said he had been satisfied in a general way that the new Panama Canal company would be capable of transferring the property to the United States with acceptable title, but that he was not a lawyer and that he felt satisfied, in case the company was not capable of transferring the property, that the Panama route should be favorably acted upon by Congress, the President would be assured by competent advice.

He also said that the Panama route was a preferable route, and that he considered the engineering proposition as practicable and the diplomatic negotiation as feasible.

He said he had had no negotiations with M. Laro, secretary-general of the new Panama company, beyond receiving the preliminary plan of the route, and that company to him, as had been published. He had, however, made inquiries of M. Laro concerning his company's title to the property.

In reply to a question from Senator Morgan as to whether the government of the United States had had any negotiations with the government of Colombia relating to the transfer of the property, Admiral Walker said that he had not had any negotiations with the government of Colombia, but that he had had some information from the government of Colombia that it was not at liberty to dispose of it.

He said that the government of Colombia would be bound by any obligation assumed by the Panama company, and that the government of Colombia would be bound by any obligation assumed by the Panama company.

The Admiral was questioned concerning the French history of the project of interest in the Panama canal, but he replied that he knew nothing about it, except what he had heard in Paris. He said that he had heard that such a history had been authorized, but he knew nothing of the limitations placed upon it or the scope allowed it by the French government.

COLOMBIAN OFFICIALS CONFIRM.

Mr. Silva, the Colombian Minister, said tonight that he had been in consultation today with M. Muniz Daza, special commissioner appointed by the government of Panama, who is also the attorney of the Panama Railway company, and that a satisfactory conclusion was reached. Mr. Silva said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.

He said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.

He said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.

He said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.

He said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.

He said that the government of Panama would be bound by any obligation assumed by the Panama company, and that the government of Panama would be bound by any obligation assumed by the Panama company.
